

Supporting a Mission for Vision

The Minnesota Lions Vision Foundation helps improve vision by providing operating funds for Lions Gift of Sight, by donating money to University of Minnesota Department of Ophthalmology and Visual Neurosciences priorities, and by supporting other vision-related projects.

Financial gifts support the sight-saving work of the Vision Foundation.

Enclosed is a tax-deductible gift of: \$25 \$50 \$100 Other \$ _____

Please make checks payable to Minnesota Lions Vision Foundation.

Gift made by:

Name _____

Address _____

How would you prefer your gift be allocated?

Lions Gift of Sight

Lions Macular Degeneration Center

Lions Eye Surgery Center

Area of greatest need

Lions Children's Eye Clinic

This gift is:

in memory of _____

in honor of _____

Please notify: _____

Mail donation to: Minnesota Lions Vision Foundation
1000 Westgate Drive, Suite 260
Saint Paul, MN 55114

Thank you for your gift to the Minnesota Lions Vision Foundation!

Minnesota Lions Sight Program

The Minnesota Lions Vision Foundation supports vision-related endeavors, including the Lions Sight Program at the University of Minnesota. The Sight Program partnership began in 1960 when Minnesota Lions established the Minnesota Lions Eye Bank. Work with the University's Department of Ophthalmology expanded over the years, and to-date the Lions have donated more than \$18 million to University vision programs.

The Lions Sight Program at the University of Minnesota includes:

Minnesota Lions Eye Bank, dedicated to recovering, processing, and distributing donated eye tissue for use in sight-saving corneal transplants, vision-enhancing surgery, research, and education. The only eye bank in Minnesota, the eye bank also serves western Wisconsin and many cities in North Dakota. For more information about the Minnesota Lions Eye Bank, visit MnLionsEyeBank.org.

Lions Children's Eye Clinic, where more than 8,000 children are seen every year by ophthalmologists specializing in pediatrics. Established in 1969, the clinic is one of the largest and best-staffed pediatric ophthalmology clinic in the country and is dedicated to giving every child a lifetime of sight. To contact the clinic, call 612-365-8350.

Ophthalmology Research at the Lions Research Building. The University of Minnesota Lions Research Building, which opened its doors in 1993, includes state-of-the-art laboratories where investigators from the departments of ophthalmology, otolaryngology, and neurology collaborate with other University departments on research projects. The support of research is vital to the discovery of new treatments and cures for diseases like macular degeneration, diabetic retinopathy, and glaucoma.

Minnesota Lions Macular Degeneration Research and Rehabilitation Center (The MAC), established in 1998. The MAC brings together the expertise of physicians, the research of various departments around the University, and the knowledge of those in the medical technology industry. It is a powerful collaboration of resources dedicated to fighting macular degeneration, the leading cause of blindness in the United States.

Minnesota Lions Eye Surgery Center, established in 2015. University of Minnesota ophthalmologists are among the best in the world, treating the full spectrum of eye health issues, including surgical treatments for the most complicated and challenging cases of glaucoma, cataracts, conditions of the retina and cornea, and others. With the aging of our population, demand for the medical and surgical expertise of ophthalmologists will increase more than 33% in the next five years. Innovative new treatments now under development are also increasing the demand for specialized eye surgery. Having surgical suites specifically for eye surgery on the University of Minnesota campus is critical to getting patients the care they need.
